GATEWAYS PROJECT
ABOUT

In July 2011, Vice Chancellor John Meyer merged the four units charged with operating and maintaining outdoor spaces—the Arboretum, Grounds and Landscape Services, Putah Creek Riparian Reserve, and Civil and Industrial Services. These units, with strengths respectively in community engagement, large-scale landscape management practices, native habitat restoration, and construction came together under the leadership of Kathleen Socolofsky, Assistant Vice Chancellor and Arboretum Director, to create a team responsible for leading the campus to a new level of sophistication and collaboration in its approach to stewarding the campus landscape. This new “Public Garden” team would also work in partnership with Assistant Vice Chancellor Bob Segar, and his Campus Planning and Community Resources team, to support the larger vision of UC Davis as a visitor-centered destination and model for campus planning best practices.

Discussions with the Arboretum GATEways Planning Council, staff and stakeholders led our public garden team to the conclusion that the “UC Davis Arboretum GATEways Project,” a new model for university gardens created by Arboretum staff and stakeholders in 2005 solely for the Arboretum, was the right project approach to upsize to our entire campus landscape and now serve as foundation for the “UC Davis GATEways Project.”

GET INVOLVED  Sign-up and learn more at arboretum.ucdavis.edu

- Sign-up for the Egghead/Mrank Hall planting day
- Sign-up to receive the Arboretum & Public Garden blog
- Let others know about the GATEways Project and the upcoming fundraising opportunities
- Join the Friends of the UC Davis Arboretum and Public Garden
- Learn more about the GATEways Project
  Attend our Shovel Donation & Beer Tasting at Whole Foods: Friday, August 9 from 6:30-8:30 pm
  Can’t attend but have a shovel you’d like to donate to our sculpture? Learn more at arboretum.ucdavis.edu.
- Review the GATEways Concept Guide & GATEways Progress Update
